

**FOR IMMEDIATE RELEASE:**

## **Image Digital Printing and Vehiclewraps.ca Have Expanded AGAIN!**

(August 01, 2005 – Oshawa) - Image Digital Printing (IDP) has traded in their 4500 square foot facility for a bigger and better production space that is now more than double its original size.

The new home of this, ever-growing, digital printing company is located at 1097 Boundary Rd, in Oshawa, Ontario, and offers almost 10,000 square feet of sales, design and production space.

After hiring more staff and acquiring new production equipment, it was becoming increasingly difficult to function in a facility that the company has outgrown in less than 1 year.

“Our new location will help us streamline our workflow, stage jobs properly and meet client deadlines much more efficiently” says Rob Tenwesteneind, Partner of IDP and Vehiclewraps.ca. He adds that the division of space between production, finishing, design and sales allows each department to function at their highest capacity.

Owners Rob Tenwesteneind and Paul Valdstyn agree that the larger facility will translate into faster project turn-around, the ability to produce higher volume orders while maintaining competitive pricing.

“We are serious about our business, serious our performance and serious about quality” Tenwesteneind says, and adds “Not only will this move help our company grow, but it will help our trade clients to grow as well.”
